

## Ace

Our wolf pup's name is Ace. The reason that we chose the name Ace is because one of the definitions of Ace is one of the top ranked playing cards in a deck of cards. We hope that with this name our pup will become one of the top wolves in his pack. The other definition is a person who is good at a certain sport or activity. Because of this, we hope that Ace will be good at whatever he does and become a very healthy and fit wolf. This is why we named our wolf pup Ace and we hope that you will like this name to.

## Akimi

I think the name Akimi is right for the pup because, first of all, the name is gender neutral, so it does not matter whether the pup's male or female, so the name would work either way. Second, the name, meaning "autumn fruit" in Japanese, seems like a good name for a forest animal, and the wolf's tawny fur reminds me of autumn leaves. Akimi also is a very sweet sounding name, and that would suit the pup's cute face.

### **Andy**

**I think a perfect name for a Mexican Gray Wolf is Andy. I chose this name because it works for either a boy or a girl, and I've always thought it was a cool name. I think it would match the personality of an energetic and playful pup, but it could really work for any. It is also very easy to remember. The name comes from the Greek word Andreas, which means "brave". I think most wolves are very brave creatures and so this name matches them perfectly. When I was trying to come up with name ideas, I looked at pictures of the wolf pups and I thought Andy seemed like a really good name. It is also not a very common animal name, so it will stand out. Anyway, I think Andy is a good name for a playful wolf pup.**
