## **Basil**

Basil is a great name for a wolf because it means brave, kingly, and valiant in Arabic.

Mexican grey wolves are almost extinct and being named Basil shows that she is a brave wolf who can be a leader to get herself and other wolves through challenges. The name Basil originally comes from the name Vassilios. A wolf's name has to be assertive so that they are not seen as weak to other wolves. Mexican Grey Wolves are becoming endangered. Basil was chosen because it means that the wolf is leader-like and does not give up easily, and the species cannot give up easily now because they are facing extinct.
