

Esprit

**Bria Shay N.
3rd Grade**

**Esprit is French for 'Spirit'.
I picked this name because wolves have
a beautiful spirit and deserve to be
protected**

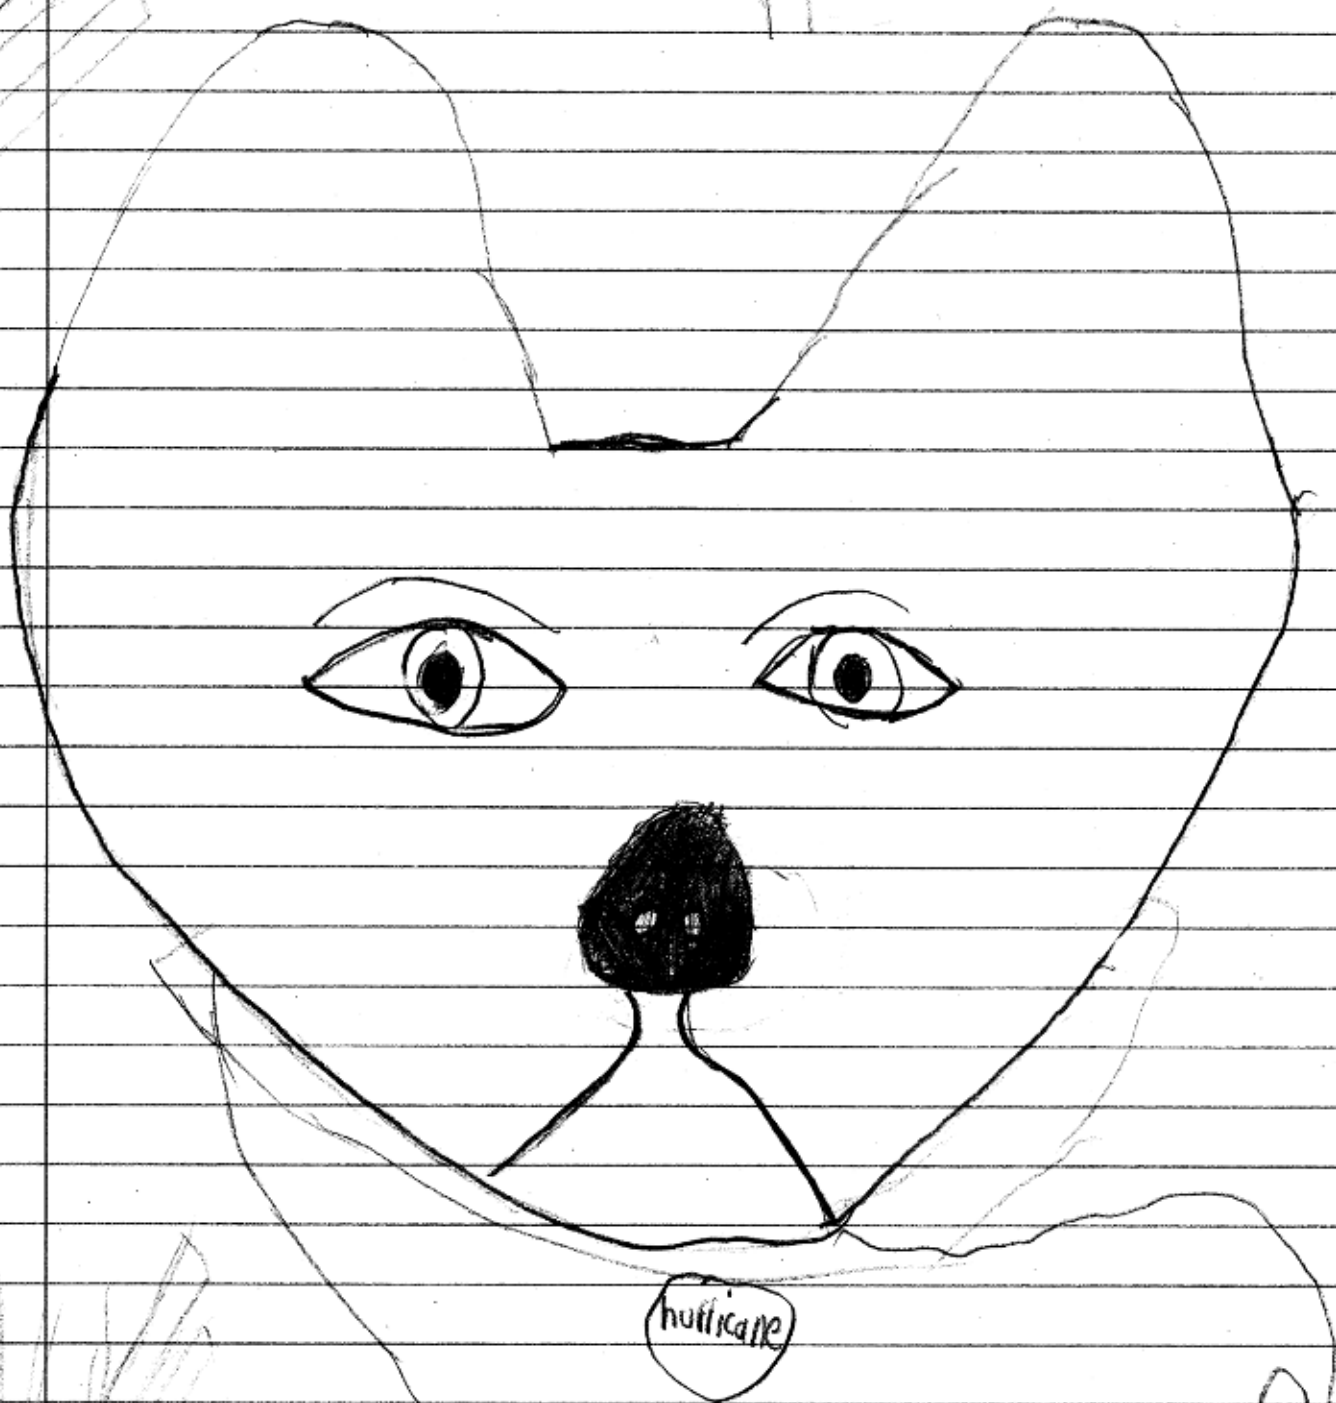

Courage Renea Stratton
Wolves are courageous, and they 4th Grade
never back down, also, they defend
the rest of their pack.

Crimson and Alastar
I named these Mexican wolves that because of
its wild coat color and have true bonds with
one another.

Adan

For my Mexican Gray wolf pup name is hurricane because what happens if somebody is robbing mexicans gray wolfs pup and if they read the name that is hurricane and if actually happens and also because if they rob the Mexican gray wolf pups, the pups could grow up and eat you for lunch.

Canela

Alexis C.

Alexia

I think that if I had a wolf it would be named Canela because I had a dog named like that and died 1 year ago. A other reson to name him like that is because it lives in the wild and it is brown like the butiful dirt wet with green all over it. In my opinion is that canela is reedly mawn like a very good vitiman for a mexican person and allways used to eat rice with milk or "Aroz con leche". Canela is a very good name because for Mexico it would be a medicen to kill allergys and virusis. They would put it on wolf for them to not get little animals in there puffy hair. Canela stans for cinnamon her in the United States. That is the reson that a Wolf pup should be calld in my opinion. Wolf should not be kill by humans. They need to live!!

Ava E. Dougherty

Mexican gray wolf

Written by Ava E. Dougherty

I think the new Mexican gray wolf pup should be named Phoenix because phoenixes never die out and when they fall they rise out of their ashes and live once again. Another reason that the new pup should be named phoenix is because Mexican gray wolves live in desert biomes and Phoenix, Arizona is also a desert biome. Arizona was also one of the historical ranges of the Mexican gray wolf. One of the greatest threats to the Mexican gray wolves are humans. Humans have eliminated the population of these wolves and it took massive amounts of breeding to get them back and they are still slowly being eliminated to this day, and if we don't act fast their population might be wiped out for good. Mexican gray wolves play a very important part in our environment by keeping the prey population in check and if there is too little or too much of one animal the rest can go out of balance. So that is why we have to try our hardest to try to keep the Mexican gray wolves from being wiped out by protecting our environment and sustaining its health to protect all the animals who live in it including the Mexican gray wolves.

The Hope Of A Name

By Avery Cornia

Out there
she is alone.
Hoping to get something she's never gotten before.
With her big blue eyes
she looks up asking,
anxiously,
for a NAME.

She hope and hopes
until,
the little grey wolf gets a gift.
She is brave!
She is
Valiente!

(Valiente is Spanish for brave. And this Mexican Gray Wolf pup is truly... Valiente!)

Isra
Isra means freedom. The pups
deserve the land and freedom to grow.

Wolf

By Brianna

Spirit Wolf

Spirit W[🐾]If

I'm the wolf that roams my lands.
I'm the wolf that howls at ancient moons.
I am the wolf that hunts my prey.
I am the alpha that leads my pack.
When you're in the forest, I'll know
you're there.
When you howl, I'll howl back.
I am fierce, but also afraid...
When I leave the safety of the park, sadly
I can be hunted, trapped and killed..
No longer the wolf that roams the lands.
My pack is broken with nowhere to turn.

“NOW! IS THE TIME FOR YOU TO
SPEAK FOR ME!!!! Or, I will howl no
more.”

Lupin

by Cleo Cummins

Lupin.

Wolf-like,
barred teeth,
soft fur,
silvery, black and white.

Lupin flowers,
sweetly scented,
making the world
beautiful.

Lupin,
like a wolf.

Lupin,
beautiful flowers.
My sweet little Lupin.

Espíritu

Poema del lobo mexicano

Yo nombre a mi lobito
espíritu de llerro porque es un
nombre muy fuerte y me llena
el corazón. Me gustó el
nombre mucho y en mi opi-
nion el nombre de espíritu
de llerro es muy bonita.

Y agarre el nombre del
lobo porque el color del
llerro es parecido al color
del pelaje del lobo. Y si
no sabes que color es pue-
es como un color marron
mesclado con un color maso-
menos grisecito es un color
muy bonito. Y el lobito es
todo un guerero. Y todos tienen
que luchar para llegar a su
su destino.

Chalupa Batman

Esme B. - 5th Grade

My name is Esmé Tsuzuki Betsch. I want to name the wolf pup Chalupa Batman. It stands for strength, that's the Batman part. Also, everybody loves food, that's exactly what a chalupa is. (If you don't know, a chalupa is a taco and the shell is a fried tortilla. Yummy!) If you put it all together, (besides getting a bat taco) you will find, Chalupa Batman! In honor of the wolf pup, I made three haikus that represent what I think of when I hear the word wolf. A haiku is a type of poem that has three lines. In the first line there are five syllables, in the second there are seven, and there are five syllables again in the last line. I hope you enjoy!

Lupus, Loup, Lobo...
My majestic, strong, gray wolf...
Chalupa Batman...

Hidden by the trees...
Shadowing in the forest...
Sneaking quietly...

Fierce, strong, smart hunters...
Finding prey a mile away...
Snow wipes out your tracks...

Destiny

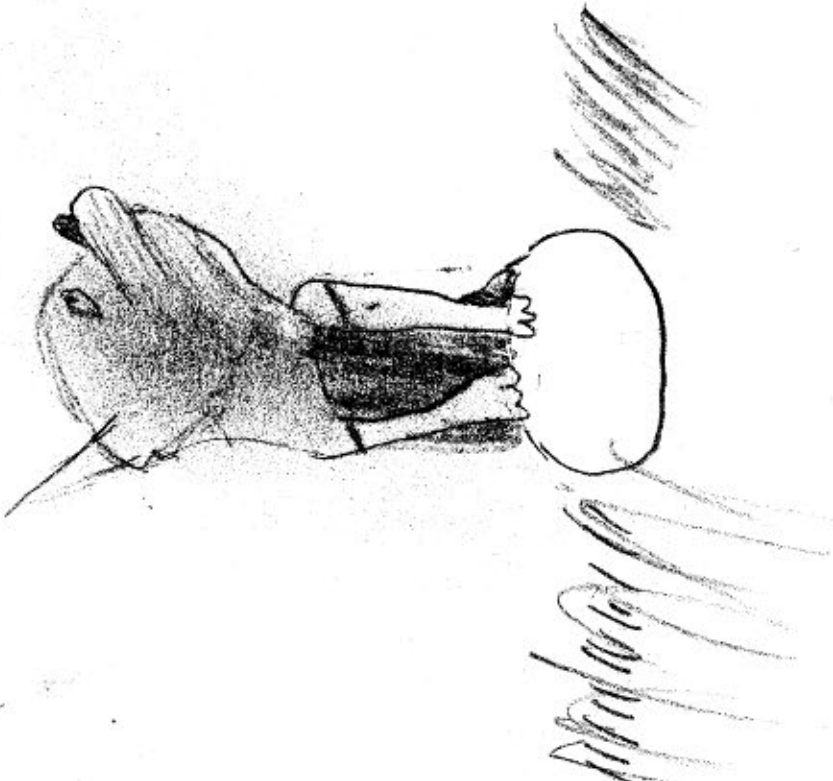

by: Gabriela
Hernández

The Mexican gray wolf, has a lot of glamour, yet some don't see it, nor do they have benevolence, that caused an era of destruction for them, the endanger to the species. Though I believe, there is a goal, a destiny. I believe that the new generation, should be halcyon, as a talisman, destiny will be a lagniappe, the special, kind gift. Fighting it's way to destiny, and it would have an eternal pride, for which it stands to a safe world. Since the 1900th they were struggling for too much, that they have become a subspecies. They fight for a incipient, a destiny that is slowly developing. The wolf is native to southeastern part of Arizona, Southern New Mexico, western Texas and Northern Mexico. It's ancestors, were the Beringian wolf, to go extinct, basic genetic characteristics. But good news slowly arrives; 1977 Mexico started a Mexican gray wolf breeding program that soon would send them the northern states, in recovery areas. And according to "The Mexican wolf recovery program" they've had lots of efforts, 110 wolves were released to wild, and are in the wild in 2015. They are getting there, to they're destiny. Therefore I believe that one pup for the Annual pup naming contest "Destiny is name I chose." ☺

Ranger

Gabriel H. - 5th Grade

Name: *Ranger*

Ranger Wolf Pup

by: Gabriel Hernandez

In the den being hunted, hiding in the shadows, hunting elk and whitetail deer

Carefully stalking prey, creeping slowly in the perfect moment they tackle the elk.

They are going to enjoy dinner tonight... the pups feasting on the dead body of elk.

The alpha eating all that his stomach can hold; the alpha female is also eating
as much as she can.

The pack members get their fair share.

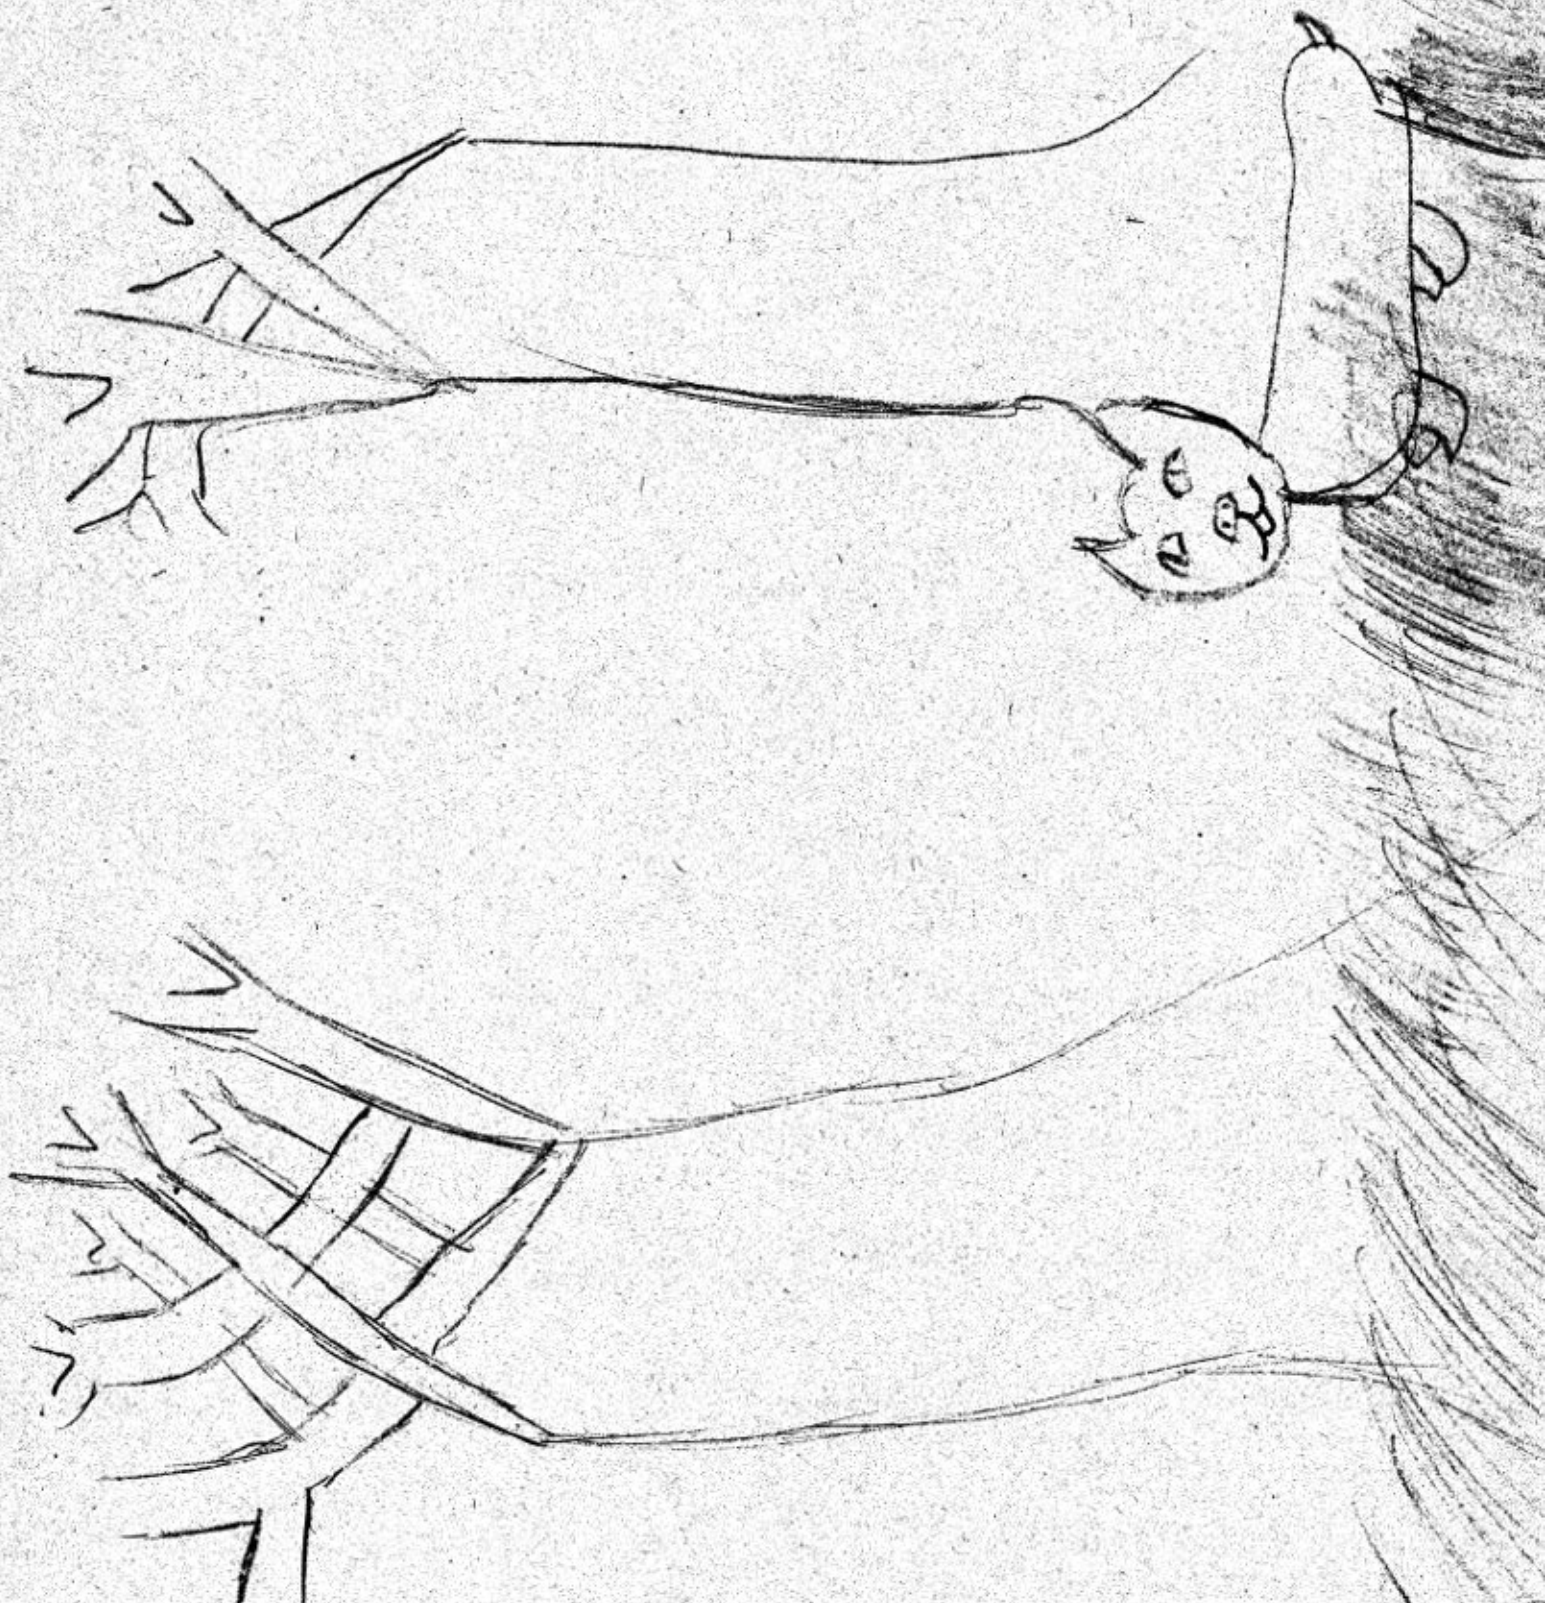

Demolishing the elk destroying the elk limb from limb, eating the elk.

The pups are drinking their mom's milk.

The wolf pup's name is Ranger.

Wolf PUP'S

Itzel
Hernandez
Jan 4, 2016

Wolf pups are so cute and strong and helpful but there more special for us because they fight for us and a lot of wolf pups are dying they are really special and we will fight for them because they save us and protect us.

Wolf could be a little over protecting with thier pups so wolf pups are really protected because like i said they are in danger so thats why they will be scared or they will fight to save their cubs and a lots of people have wolf pups for pet.

If I had a wolf pup I will name it Soledad because that name is a butiful name and because it will be in the son a lot so that why I shosed Soledad
